Patient Financial Policy

- In order to reduce confusion and misunderstanding between our patients and the practice, we have adopted
 the following financial policy. If you have any questions about the policy, please discuss them with our
 practice administrator. We are dedicated to providing the best possible care and service to you and regard
 your complete understanding of your financial responsibilities as an essential element of your care and
 treatment.
- Unless other arrangements have been made in advance by either yourself or your health coverage carrier, full payment for cosmetic procedures is due ten (10) days prior to your procedure. For your convenience we will accept VISA/Discover/Mastercard and American Express.
- Your insurance policy is a contract between you and your insurance company, the doctor is not involved.
- As a courtesy, we will file your insurance claim for you if you assign the benefits to the doctor. In other words, you agree to have your insurance pay the doctor directly. If your insurance company does not pay the practice within a reasonable length of time, we will have to look to you for payment.
- We have made prior arrangements with many insurers and other health plans to accept an assignment
 of benefits. We will bill those plans for whom we have an agreement and will only require you to pay the
 authorized co-payment at the time of service. We will collect the co-payment when you are here for your
 appointment.
- If you have insurance coverage with a plan that we do not have a prior agreement, we will prepare and send the claim for you on an unassigned basis. This means your insurer will send the payment directly to you. Therefore, our charges for your care and treatment are due at the time of the service.
- All health plans are not the same and do not cover the same services. In the event your health plan
 determines a service to be "not covered", you will be responsible for the complete charge. Payment is due
 upon receipt of a statement from our office.
- It is the patient's responsibility to contact their insurance carrier and to know if the doctor is in-network or out of network according to their plan.
- For all services provided in the hospital, we will bill your health plan. Any balance due is your responsibility and is due upon receipt of a statement from our office.
- For all services rendered to minor patients, we will look to the adult accompanying the patient and the parent or guardian with custody for payment.
- In order to provide the best possible service and availability to all our patients, please call us as early as possible if you know you will need to reschedule your appointment.
- I have read and understand the financial policy of the practice and I agree to be bound by its terms. I also understand and agree that such terms may be amended from time-to-time by the practice.

Informed Consent for Telemedicine Services

PATIENT NAME:	Date of Birth:
LOCATION OF PATIENT:	Date of consent:

INTRODUCTION:

Telemedicine involves the use of electronic communications to enable health care providers at different locations to share individual patient medical/dental information for the purpose of improving patient care. Providers may include primary care clinicians, specialists, and/or subspecialists. The information may be used for diagnosis, therapy, follow-up and/or education, and may include any of the following:

- · Patient healthcare records
- Medical images
- · Live two-way audio and video
- Output data from medical devices and sound and video files

Electronic systems used will incorporate network and software security protocols to protect the confidentiality of patient identification and imaging data and will include measures to safeguard the data and to ensure its integrity against intentional or unintentional corruption.

EXPECTED BENEFITS:

- Improved access to medical care by enabling a patient to remain at a remote site.
- More efficient healthcare evaluation and management.
- · Obtaining expertise of a distant specialist.

POSSIBLE RISKS:

As with any healthcare procedure, there are potential risks associated with the use of telemedicine. The risks include, but may not be limited to:

- In rare cases, information transmitted may not be sufficient (e.g. poor resolution of images) to allow for appropriate medical decision making by the physician and consultant (s).
- Delays in evaluation and treatment could occur due to deficiencies or failures of the equipment.
- In very rare instances, security protocols could fail, causing a breach of privacy of personal medical information.
- In rare cases, a lack of access to complete treatment may result in adverse drug interactions or allergic reactions or other judgment errors.
